THANGAMANI K

DATA ANALYST

+91-7094156305 | thangamanikumaran24@gmail.com | LinkedIn | GitHub | Portfolio
Karaikal, Puducherry, India - Open to relocate Dubai, UAE

PROFESSIONAL SUMMARY

Early-career Data Analyst and B.Tech Information Technology graduate with project-based experience in e-commerce analytics, conversion funnel analysis, A/B testing, and digital marketing performance. Proficient in SQL, Python, BigQuery, and Power BI, with knowledge of GA4 event data, statistical hypothesis testing, customer journey analysis, and key marketing metrics (CTR, CPC, CPA, and ROAS). Skilled at identifying conversion drop-offs, evaluating performance trends, and translating data insights into actionable CRO recommendations.

EDUCATION

Puducherry Technological University 2022 - 2026
B.Tech - Information Technology | CGPA: 7.98/10

CORE SKILLS

Experimentation & CRO: A/B testing, hypothesis design, sample-size considerations, statistical significance, p-values, confidence intervals, funnel analysis, segmentation, root-cause analysis.
SQL & Data: SQL, BigQuery, MySQL, joins, CTEs, window functions, aggregations, GA4 event data, data cleaning and validation.
Python & Statistics: Python, Pandas, NumPy, SciPy, Matplotlib, EDA, hypothesis testing, statistical analysis, automation.
E-commerce & Marketing: Shopify sales analysis, customer retention, conversion rate, CTR, CPC, CPA, ROAS, KPI reporting.
BI & AI Tools: Power BI, Tableau, Excel, ChatGPT-assisted analysis and reporting.

PROJECTS

E-Commerce Conversion Funnel Analysis | SQL, BigQuery, GA4, Python
- Queried GA4 event data for product views, add-to-cart, checkout and purchase; compared funnel drop-offs by device and acquisition source to pinpoint conversion friction.
- Translated segment-level findings into prioritized, testable CRO hypotheses and checkout-optimization recommendations.

A/B Testing & Statistical Analysis | Python, Pandas, SciPy
- Compared control and treatment conversion rates using hypothesis testing, p-values and confidence intervals.
- Documented sample-size considerations, significance thresholds and bias risks; converted results into evidence-based product and marketing recommendations.

Marketing Campaign Performance Analysis | Python, Pandas, Matplotlib
- Calculated CTR, CPC, conversion rate, CPA and ROAS from campaign impressions, clicks, spend and revenue to compare acquisition-channel efficiency.
- Visualized performance trends and identified budget-optimization opportunities focused on improving ROAS and reducing CPA.

Shopify Sales & Customer Funnel Analysis | Power BI
- Performed sales and customer funnel analysis using Shopify data, evaluating net sales, order value, customer retention, repeat purchases, products, and payment gateways.
- Built an interactive Power BI dashboard with KPI metrics, maps, charts, slicers, and trend analysis to monitor sales performance and customer behavior.

INTERNSHIP EXPERIENCE

NSIC — AI & Machine Learning Intern *3-Week* *Chennai*
- Applied Python-based AI/ML fundamentals and automation techniques to analytical problem-solving and basic model-building workflows.

National Mental Health Program | GH — Frontend Development Intern *3-Week* *Puducherry*
- Contributed to a healthcare learning-disability detection system using React, responsive UI development and secure healthcare-data handling.

CERTIFICATIONS

- **Deloitte Data Analytics Job Simulation** (Forage) - Data analysis, data visualization, and forensic technology
- **Tata GenAI Powered Data Analytics Job Simulation** (Forage) - Applied Generative AI for business reporting and analytics
- **IBM Data Analysis with Python** (Cognitive Class) - Python-based data analysis, visualization, and manipulation
- **SQL Certification** (Simplilearn) - SQL fundamentals, queries, joins, and database operations
- **Microsoft Excel Certification** (Simplilearn) - Excel fundamentals and data manipulation
